

Dear Ms. Graham:

I am a sophomore on the road to completing my bachelor's degree in Computer Science with a minor in Mathematics. My expected graduation date is May 2022 with a total number of 133 credits (or more). Thanks to the scholarship I have been able to attain the classes that I need each semester, and will continue to be able to do so should I continue to be eligible for the scholarship. I am grateful to those that fund the scholarship and for enabling dozens of students such as I to be able to follow our dreams without having to worry about finances.

With this scholarship, I will be saving any leftover money for graduate school. I plan to attain a Master's degree in data analysis and, hopefully, have a career as a data analyst. Due to your generosity, I have been able to further improve my coding skills through Udemy, a website where I can pay for full classes to work on in my own time outside of college. Through these classes I will learn new coding languages and learn more about languages that I already know. This allows me to further my education outside of Hunter and to improve my resume. I would not have been able to do these things without your help, so thank you!

***S.A., 2020 Olga Graham Scholar***
