

Dear Mrs. Graham,

I am a student at Hunter College and currently majoring in Human Biology as a senior. First off, I'd like to thank you for allowing me to participate in the Mother's Day Scholarship. This scholarship has assisted me tremendously in achieving my goals for the future. I plan on graduating in Spring 2021 with a bachelor's degree and using the knowledge that I obtained throughout my college years to enroll in a DPT program to become a Physical Therapist. I decided that it is in my best interest to attain a career as a Physical Therapist since my passion has always been to improve the quality of a patient's life. I know that I'm going to encounter a tough and long journey ahead of me but it's in my best interest to enjoy and appreciate the process.

This summer, I will enroll in EMT training program to receive certification in basic training and CPR. After my completion in the program, I plan on moving forward from being a first responder and utilizing the knowledge that I obtained from the EMT program to learn more about the body's motion in the DPT program. I've given myself roughly 5 years to finalize my long-term goals. This scholarship that has been funded to me gave me a head start for my future career.

Thank you.

***M.F., 2020 Olga Graham Scholar***
